## **OTORHINOLARYNGOLOGY/HEAD & NECK (ENT)**

### **ENT Casualty appointment request for Paediatric Ear Microsuction**

Microsuction in the paediatric setting is carried out if there is a demonstrated conductive hearing loss or resulting in the interference of the wearing of hearing aids.

The ENT Casualty department are **no longer accepting** referrals for paediatric microsuction as the child will most likely require an audiogram to assess their hearing thresholds. This will be performed at an OPD appointment.
