

'Teddy's Great Hospital Adventure'
on The Children's Ward at the
South Infirmary Victoria University
Hospital Cork

This is Teddy's first time in hospital so he is a little bit nervous!

All the nurses are so friendly. They helped him to relax and play in the play room.

The nurse had
to check
Teddy's blood
pressure like
this.

His arm felt a
bit funny for a
few seconds but
it didn't hurt at
all...

The nurse also put a little light on Teddy's finger to check his breathing

... and then also took his temperature just like this!

Teddy also needed to jump on the scales to have his weight checked and he put on a special gown like this one in the picture

The nurse showed Teddy the mask very like the one he would see in theatre and he practiced breathing in and out with it. 'It smells funny!' said teddy before he walked down to theatre with Mom.

In Theatre
Mom got
dressed up
too like
this !

In theatre the Anaesthetic doctor gave Teddy a mask to breathe in and out through while Mom held his hand.

When Teddy woke up his operation was all over and there was a special nurse looking after him until his mom came to collect him.

He had a small bandage like this on his hand called 'Freddy'.

Teddy got a spin back up to the Children's ward on the trolley. His operation was over!

Teddy got a Bravery Certificate like this one before he went home so everyone knew how brave he was in hospital.

THE END

Thanks to everyone in the hospital that helped
with the development of this booklet.
